

Proposal for Discussion

Right:

Broadcasting organizations shall have the right to authorize the simultaneous or near-simultaneous retransmission of their broadcast or pre-broadcast signal over any medium.

Definitions:

A "near-simultaneous" retransmission is one that is delayed only to the extent necessary to accommodate time differences or to facilitate the technical transmission of the signal.

A "pre-broadcast signal" is a signal transmitted to the broadcasting organization for the purpose of subsequent transmission to the public.
