THURSDAY —— Does UID Bring Financial Inclusion? Ram has received his UID number and decides to put it to use. Living in a village, Ram decides to use the number to open a UID enabled bank account. He is excited as currently there is corruption and problems with the banking system in rural areas. Yet as he signs up for the bank account he realises that all his problems are not solved as financial transactions will require network connectivity to take place and to collect money, he will must withdraw money from an individual —thus still allowing for corruption. —Financial Inclusion and UID http://cis-india.org/internet-governance/privacy-aadhaar/financial-inclusion

FRIDAY —— Missing UID number from the CIDR Database? Ram decides to try and use his UID number again. When he arrives at the Fair Trade Shop he is told that his UID number does not exist in the UIDAI database. He is not sure what steps of research and who will be held liable for the mistake. Unique ID System: Pros and Cons http://cis-india.org/internet-governance/unique-id-system-pros-and-cons

SUNDAY —— Computerised Discrimination? Ram visits the Fair Trade Shop again to see if he can pick up his ration without his UID number. The store manager points to him that someone has already claimed his ration using his UID number in Bangalore—A Report http://cis-india.org/internet-governance/blog/privacy/uid-reading-ration-number

SATURDAY —— UID used for what? By whom? Ram is walking to the neighbouring town. On the way he is stopped and asked by law enforcement for his UID number. This surprises Ram as he thought the UID was an authentication and not an identity—especially because it does not specify if he is a resident or a citizen. He was also surprised because he thought the UIDrama proposed to be used by the government to improve the PDS system—and yet it seems that now law enforcement are using the UID number! Who else will need the UID number and for what purpose? - Analysing the Right to Privacy and Dignity with Respect to the UID http://cis-india.org/internet-governance/blog/privacy/privacy-aadhaar-proposal
